

contid. of Activity specializations.:

3. Craft invention

There is a substantial and important faction of enthusiasts that end up being the key contributors to innovative design. Many of these are content to dream about flight while they do in fact contribute significant advances that bring better wings for everyone else. These people are not given enough attention; they are often quiet, purposeful, and only sometimes flight aggressive. When communication is really open between the skill flyer and this crafty group, much progress takes place and the state of the art zooms forward. Every club ought to give attention to not being guilty of unjustly stratifying their members as regards praise for ideas.

4. Calm air flight specialists

There are many opportunities for people to develop and practice very specialized and interesting skills in calm air. Why calm air? It is special, homogeneous, dependable, predictable, gustless, measurable..... Its use for special flight produces activities that cannot be perfected in non-calm air. And

And we speak to two major divisions:

- a. Flight very near the ground
- b. Flight very high off the ground.

In both realms we find people specializing. Some really enjoy the effortless glides off very high mountain peaks. They might really savor the hobby of tuning their ship to its quietest form and control mode. They might here begin man-power input experiments wherein they can get very good at measuring the effect of their propulsion inputs as they compare flight after flight at a calm air site, varying their experiments.

Flight very near the ground in calm air is a specialty that has some super rewards for the diligent and well practiced. Curving in and out of rocks, trees, houses, bushes,visiting the surprised rabbit and quail, cross-pollinating the field, touch and go, ground effecting, and more are waiting the person who perfects the environment of the very close.

5. SPORT Competition enthusiasts

Promotion and industry support are needed to keep this going at a high enough pitch to make such popularly possible. It involves more people when counting spectators and participants. Since the public is keenly exposed by efforts of the industry and promoters, one understands why controls and regulations must become standard and certain; thousands of participants will come and try with most of their attention on the social forces of the activity; they must be helped profoundly as regards skill development so that they ~~are~~ will be safe.
